

# The Daily Gazetteer.

MONDAY, JUNE 20. 1737.

No. 619.

Last Saturday arriv'd a Mail from Holland.

THE Letters from Warſaw of the 26th ult. O. S. mention Advices from the Polish Frontiers, which are more promiſing of Peace than of War; for they ſay that Baron de Dalman, the Emperor's Ambaſſador in Turkey, has propoſed a Suspension of Arms for ſome Months, to

which the Porte ſeems inclinable; and that 'twas believed this Propoſal would be laid upon the Carpet, in the very firſt Conferences between the Plenipotentiaries on both Sides.

Thoſe from Petersburgh, which are of the 24th ditto, carry the ſame Paſſick Aſpect; the Emperor's Plenipotentiary at the Ruſſian Court having received an Expreſs from the Emperor's Ambaſſador aforeſaid, at Kanſchan, 4 Leagues from Bender, with Advice that the Grand Vizier was very earneſt that the Plenipotentiaries on both Sides may aſſemble without Delay, in order to begin the Negotiations for Peace; and that he had given him to underſtand, that he doubted not but that the Difference about Aſoph might be eaſily accommodated. The Letters add, that as the Ruſſian Court ſeems diſpoſ'd to do every Thing on their Part for facilitating a Peace, they begin to think that the preſent War will be of no long Duration. At the ſame time there are Letters from Petersburgh which ſay, that on the 9th of April, Count Munich's Army was in Sight of the Turks. The Expreſs above-mention'd brought Advice at the ſame time, that the Turkiſh Army had paſſed the Danube, and was making long Marches towards Bender; with a Deſign, in all Appearance, to give Battle to the Ruſſian Army, if it advanc'd that Way.

There are freſher Letters from Warſaw, of the 28th ult. which ſeem to put it out of Diſpute, that the Conferences for Peace will be held at Nimirow, a little Town of Podolia, belonging to Count Potocky the Palatine of Kiow, and Great General of the Crown Army. The Emperor's Plenipotentiary thinking this a more proper Place than Kudack or Bialacerkiew, the ſame has been likewiſe agreed to by the Grand Vizier and the Seraskier of Bender; and the Great General has accordingly ſent Advice of it to the Count de Munich in the Army, and to the Emperor's Miniſter at Petersburgh.

The Court of Vienna has alſo received Advice from their ſaid Ambaſſador in Turkey, that the Grand Vizier was very much diſpoſed for holding a Congreſs; but whether the View of the Porte to gain Time, was not the Motive alſo of theſe favourable Appearances, could not be determin'd till the Conferences were opened. The Letters from thence, which are dated the 1ſt Inſtant, ſay, that the Duke of Lorrain, and his Brother Prince Charles, having taken Leave of the Archducheſs, and the whole Imperial Court in the moſt tender Manner, arriv'd at Preſbourg two Days before, in the Evening, being welcomed by a general Diſcharge of the Great Guns, and embark'd next Morning on the Danube, to ſerve as Volunteers in the Army which is forming on the Frontiers of Servia.

They write from the Frontiers of the Ukraine, that 24000 Turks are arriv'd at the Dnieper, and that from thence they were to advance towards the River Bugg, in order to hinder the Ruſſians from paſſing it.

The Archducheſs, Governeſs of the Auſtrian Netherlands, will return next Auguſt to Vienna, with about 350 Perſons in her Retinue, and will go to the ſame Palace and Apartments that ſhe lived in formerly: And about the ſame Time the Duke of Lorrain will ſet out for the Netherlands.

'Tis ſaid an Expreſs is arriv'd at Vienna, with News that the Turks had cauſed 50000 Men to march towards Oczakow, to make the Ruſſians pay dear for the Siege of that Place, if they ſhould attempt it.

They write from Berlin, by Letters of the 7th Inſt. that the Jews there are in a great Conſternation, the King having declar'd that he would baniſh them, and take away their Effects; and 'tis ſaid

there are above 120 Families, who are to leave the Kingdom in 8 or 10 Days. They add, that the Counteſs de Schulenburg, Maid of Honour to the Queen, is ſhortly to marry the Baron d'Arnhem, who has an Eſtate of above 20000 Crowns a Year.

From Hanover, that on the 30th ult. O. S. there fell ſuch a terrible Storm of Rain and Thunder, that all the Lower Ward was laid under Water, and two large Buildings, half a League from the Town, were reduced to Aſhes by Lightning; whereby a Life-guard Man was kill'd on the Spot with his Horſe, and a great deal of other Damage done.

They write from Petersburgh, by the way of Namburg, that the Academy of Sciences has reſolv'd to ſend two Members of their Body towards the utmoſt Frontiers of that Part of Tartary ſubject to the Czarina, in order to ſee if there be not a Navigable Way towards the Chineſe or Paſſick Sea; which was attempted, but did not ſucceed, in the Time of Peter I.

Letters of the 3d Inſtant from Dantzick ſay, that almoſt one half of Wilna, the Capital City of Lithuania, has been reduced to Aſhes by a Fire; and that among other Buildings that were conſumed, are five Convents, and ſeveral Palaces.

And thoſe of the 8th from Francfort ſay, that on the 29th of May, the Magazine at Friburg in Swiſerland, in which were 750 Barrels of Gunpowder, was blown up by Lightning, with a very dreadful Noiſe and Shock; ſo that moſt of the Houſes, and particularly the Jeſuits Convent, and 3 Nunneries, were very much damaged, the Country adjacent was as much turn'd up as if it had been plow'd, and moſt of the Stones of that and a neighbouring Tower, were carry'd out of Sight.

Stockholm, June 3. O. S. The Queen of Sweden, who has had the Fever which has been almoſt general here, in a very violent Manner, is now much better, and out of all Danger.

Dreſden, June 16. N. S. Count Sulkowski ſet out the 14th Inſtant from Toplitz for Vienna, from whence he will continue his Journey to Hungary, to take on him the Command of the Saxon Troops. The King and Queen are ſtill at Toplitz, and will remain there about ten Days: The reſt of the Royal Family are returned hither. By the laſt Letters from Vienna we had Advice, that the Saxon Horſe were arriv'd there on their March for Hungary. This Court has recalled M. Zieck, their Miniſter at Vienna, and it is ſaid that M. Bunaw, who was formerly in England, will ſucceed him.

Hague, June 25. N. S. The States of Holland ſeparated on Saturday laſt, and will meet again for their ordinary Aſſembly next Month, when they are to diſpoſe of the Regiment of Foot-Guards, and other Vacancies, Civil and Military. M. Hop, M. Aſſendelft, and the Fiſcal of the Admiralty of Zealand, are appointed to go to Antwerp, as Commiſſaries on the Part of this State, for ſettling the Tariff with the Auſtrian Netherlands.

## FOREIGN PORTS.

Elſeneur, June 18. N. S. My laſt was of the 15th Inſtant, ſince which the following Maſters have arriv'd, viz. Alex. Thifflewait, of and for Greenock from Koningsburg; George Fowler of London, from Riga for Oporto; James Miln of Montroſs, from Stockholm for Hull; John Rich, of and for Glasgow from Stockholm; John Berkley, of and from Dundee for Riga; Andrew Arbuthnot, of and for Peterhead from Dantzick; John James of Briſtol, from Hamburgh for Stockholm; John Cornick, and Richard Cole of Glasgow, from Bergen for Colberg; Robert Blaxland, of and from London for Petersburgh; Nicholas Sanderson, of and from Hull for Riga; William Swan, of and from London for Dantzick; William Eade, of and from ditto for Riga; William Colby, and William Dewitt, of and from ditto for Narva; William Clutterbuck of London, from Amſterdam for Narva; Francis Coxon of Ramſgate, from London for Stockholm; Chriſtopher Spanton, James Dick, and John Morley, of and from London for Petersburgh; Thomas Maling of Scarborough, from London for ditto; Thomas Moor, of and from London for Narva; John Deacon, of and from Hull for Stockholm; John Spinck of London, from Am-

ſterdam for Riga; Thomas Belfey, of and from London for Petersburgh; William Young, of and from Hull for ditto; William Scott, of and from London for Riga; Francis Temlinſon, of and from Hull for Petersburgh; Thomas Thornton, of and from London for Stetin; Thomas Cooper, of and from Dublin for Petersburgh; John Cole, and Edward Nicholſon, of and from Newcaſtle for Copenhagen; John Bonner, of and from London for Copenhagen; Joſeph Fillingham, of and from Hull for the Baltick.

#### This Day is published,

The Third Volume of

**THE Sacred and Profane History of** the World connected, from the Creation of the World to the Dissolution of the Assyrian Empire, at the Death of Sardanapalus, and to the Declension of the Kingdoms of Judah and Israel, under the Reigns of Abaz and Pekah.

By SAMUEL SHUCKFORD, M. A.

Chaplain in Ordinary to his Majesty.

Printed for J. and R. Tonson, and H. Knaplock.

And this Day is also published, by the same Author,

A SERMON preach'd in the Chapel at Lambeth, June 12, 1737, at the Consecration of the Right Reverend Father in God Thomas Lord Bishop of Bristol. Published by Command of his Grace the Lord Archbishop of Canterbury.

#### Concerning Gleet and Seminal Weaknesses of all Kinds.

**ALL** judicious Physicians and Surgeons allow, that nothing is more difficult to cure than Stubborn Gleet and Seminal Weaknesses, whether occasion'd by too severe purging for Venereal Injuries, violent Strains, Pollution, or any other Cause whatever; and that they are dangerous in their Consequences, as well as difficult to cure, is as certain, since they exceedingly weaken the Generative Faculties, infest the whole Nervous System, often bring on Hectic Fevers, a Tabes Dorsalis, or Consumption of the Back, or an Atrophy or Nervous Consumption, which frequently terminate in Death itself.

All such, therefore, who have the Misfortune to be troubled with Old or Stubborn Gleet, Seminal Effusions, Involuntary Emissions, excessive Nocturnal Pollutions, or any Weakness of the Kidneys, Ureters, or Bladder, the Diabetic, or Incontinency of Urine, or Difficulty of holding their Water, would doubtless be glad to meet with a certain, safe, and speedy Cure, which they most assuredly may, by taking only a small Quantity of a transcendent **BALSAMICK RESTRICTIVE ELECTUARY**, now published for a general Good, after having for many Years been experience'd never once to fail perfectly curing the most Stubborn Gleet known, in a few Days, without Difficulty or Trouble; as also all other Weaknesses of the Back, Reins, Seminal Vessels, and Urinary Passages, which it almost instantly cures, bringing to rights and restoring all those Parts and Passages to their natural Tone and pristine Vigour, in a very extraordinary Manner, and by taking a few Doses of it only.

This transcendent **BALSAMICK RESTRICTIVE ELECTUARY**, is neither disagreeable to take, nor occasions the least Disorder, but is a wonderful Restorative in all Weakness and Decay of Constitution of any Kind, and particularly strengthens the Back, Reins, Seminal and Urinary Vessels to an immense Degree, inasmuch that in any Debility of them, one Dose of it does more than ten of any other Remedy yet found out; and all Persons fatigued with Gleet or Seminal Weaknesses of any Sort, or Weaknesses of the Urinary Vessels, who take it, will in three Days time find it so very effectual, that they will be most agreeably surpris'd at it.

When a Medicine will infallibly accomplish such a safe, speedy and perfect Cure of such difficult Maladies, as Gleet and Seminal Weaknesses are, as this Great Remedy truly and directly will, even after all other Means and Medicines have been tried in vain; too much cannot be said in it, and this, All who ever took it for any of the above-mention'd Purposes, have readily declared.

The Price is but 6 s. a Pot, altho' for its absolute Efficacy, one Pot alone being sufficient in most Cases to accomplish a Cure, worth ten times as much, and by the Author's special Appointment, is to be had only at Mr. Radford's Toy-shop, at the Rose and Crown against St. Clement's Church-Yard in the Strand, ready sealed up, with a Book of Instructions, which whomsoever carefully reads will perfectly know, when the Gleet or Weakness he is afflicted with, succeeds a Venereal Injury, whether all the Malignity of the Foul Disease is entirely eradicated or not.

Note, Ask only for a 6 s. Pot of Balsamick Electuary.

Several of my Friends having propos'd their Receipts for small Numbers of Tickets in last Year's Lottery, to be subscribed altogether in my Name, to save 3 per Cent. allowed in the present Lottery, to the Subscribers for 50 Tickets and upwards: And all others possess'd of such Receipts, who are willing to have Six Shillings a Ticket saved, may in like manner, have them subscribed by

**BENJAMIN CALVERLEY,**  
At the Tilt Yard Coffee-House, Whitehall.

#### This Day is Published,

[ Price 5 s. ]

The Second Edition, in Two Volumes in Twelves.

**THE Death of the Righteous.** A Treatise consisting of Discourses, Meditations and Prayers, conducive towards Dying-well. Written in French by John Placete, Pastor of the French Church at Copenhagen (and Author of the Treatise of Conscience) Translated into English by Thomas Fenton, A. M. Rector of Nately-scure, Vicar of St. Laurence-Wotton in Hampshire, and late Student of Christ-Church, Oxford.

In these Discourses, throughout the whole there is something interwoven, which may be profitable to all Men in general; there is every where some useful Knowledge insinuated, some important Doctrine illustrated, or some instructive Lesson conveyed, which may excite pious Reflections in the Mind of every considerate Christian, in all the Seasons of his Life, in the Time of his Health and Vigour, as well as in the Days of Sickness, and at the Approach of Death.

See the Translator's Preface.

Printed for Edward Littleton, at the Mitre against St. Dunstan's Church in Fleet-street. Where may be had, Dr. Littleton's Sermons upon several practical Subjects, in two Volumes in Octavo, the second Edition, Price 9 s. And all other Books at the lowest Prices.

#### This Day is Published,

( Being the best Book extant of the Kind )

The Second Edition, with considerable Additions, Corrected and much Improved, of

**THE MOTION of FLUIDS, Natural and Artificial,** in particular that of the AIR and WATER: In a Familiar Manner proposed and proved by evident and conclusive Experiments; to which are added many useful Remarks. Done with such Plainness and Perspicuity, as that they may be understood by the Unlearned. For whose Sake is annexed, A short Explanation of such uncommon Terms, which in Treating on this Subject could not, without Affeculation, be avoided. With plain Draughts of such Experiments and Machines, which, by Description only, might not readily be comprehended.

Nata est Ars ab Experimento.

QUINTIL.

By M. CLARE, A. M. and F. R. S.

The following Articles are fully and particularly Explained, viz.

Statics and Hydrostatics defined; their Advantages and Use described.	On the Hydrometer or Water-poize.
On Fluidity in general.	The Principles on which the Experiments on the Hydrostatical Balance depends, demonstrated.
Hydrostatical Principles demonstrated.	On the Use of the Hydrostatical Balance.
The Hydrostatical Paradox cleared.	Pneumatics defined.
On the Attraction of Cohesion.	Properties of the Air described.
On Specific Gravity in general.	On the Barometer.
On the Syphon or Crane.	On the Air-Pump.
On the Syphon disguised.	The Cause of the Barometer refused, and prosecuted.
On Natural Syphons.	Directions for observing the Weather by the Barometer.
On the Use of the Air's Pressure, in raising Fluids.	Certain Effects of the Air's Pressure described.
On Suction by Machines.	On the Art of Diving.
On the Pump in general.	Some Effects of the Atmospheric Pressure on Animal and other Bodies.
On the Sucking-Pump.	On Muscular Motion.
On the Disposition of the Pump-work.	On the Heart and Circulation of the Blood.
On the Disposition of Pipes of Conduct.	On Digestion, Sanguification and Nutrition.
On Leathering the Pistons of Pumps.	On Animal Inspiration and Expiration.
On the Lifting Pump.	On Animal Suction.
On the Forcing Pump.	On the Spring and Elasticity of the Air.
On Fire Engines.	On the Manner of Cupping.
On the Engine for raising Water by Fire.	On the Rise of the Sap in Plants.
On the Chain Pump.	On the Thermometer.
On the Engine for raising Water by the Multiplying-Wheel.	On the Hygrometer.
Fluids are sustained in the Air without a Counter-pressure from above.	On the Origin and Progress of the Winds.
On the Fountain at Command.	On smoky Chimneys.
On the Double Funnel.	The Cause of the Winds continued.
On the Antigugler or Air-pipe.	On the natural Causes of Thunder, Lightning, and Meteors.
On the Flux of Fluids in a Stream, both confined and not.	On the Rise of Vapours, their Formation into a Cloud, and their Resolution into Rain.
On the Size of Pipes of Conduct.	On the Origin and Source of Springs.
On Friction and Obstructions in Water-works.	On Hail, Snow and Frost.
On the Acceleration of Falling Bodies by Gravity.	On Sounds.
The Motion of Projectiles demonstrated to be nearly in the Parabolic Curve.	On the Speaking Trumpet and Auricular Tube.
On the Resistance of Fluids to Bodies moving therein.	On Places of Hearing.
On Jets-d'Eau.	On the Echo.
On the Specific Gravity of particular Bodies.	On the Tides.

Printed for E. Symon against the Royal Exchange in Cornhill
